**We understand the challenge employee healthcare presents to**

## **our local small businesses. Not all solutions come from Washington...**

- **Ashewell offers savings to both employers and employees:**
  - Unlimited employee healthcare is \$59/month. There is never a copay or any fee for seeing your doctor.
  - 90% of insurance claims are primary care claims and our goal is to absorb all the cost associated with your employees' primary care. We exceed this goal by preventing costly urgent and emergent visits.
  - Employee health matters. It is not enough just to give patients access to a doctor, we believe medications, labs, imaging, procedures and specialty care should be affordable. We offer these wholesale membership benefits at cost.
- **Healthy employees are the foundation of healthy businesses.**
  - Good employees are likely to seek employment which offers health benefits. Employee health facilitates employee hiring and retention.
  - We keep our patients healthy by guaranteeing same day and next day appointments, and offer access to our doctors by phone, email, and text message for urgent and emergent issues 24 hours/day.
  - Insurance is not Healthcare. Our care is offered regardless of whether employees are insured or not.
  - At Ashewell, we offer high quality, personalized care from our board-certified internist inspiring confidence and wellness. A personal touch is just standard.

***We take the worry out of healthcare. As the employer, you are billed \$59/month/employee/spouse/adult family member. You can pay anywhere from 0-100% of this amount. You can also use a payroll deduction, allowing your employee to contribute 0-100%. We ask each employee to put a method of payment on file for medications and labs. An HSA can be used for our services and all benefits.***
